

Office of the President

05 June 2017

Dear Mr. President

My name is Grievance Sipikita and I am a Zimbabwean citizen. I have never been a politician or participated in any political activities of the country but I was watching the countries developments as they folded.

I write this letter Mr. President to express my democratic rights enshrined in the constitution, the constitution you signed into effect to air my displeasure and disgust over certain issues that you as the head of the state have failed to deal with leaving Zimbabweans questioning your capability to take the nation forward. Mr. President, I am not fighting against you, but a system in which you operate a system that has left 90 % of the population unemployed, half of the population scavenging abroad and a country with no national currency 37 years from Independence.

The issues are as follows:

1) **Rampant Corruption**

Mr. President Corruption is now normal in this country. Even your R.B.Z Governor would agree with me that it is now cancer which needs a strong leader to weed out. Corruption is rampant in Parastatals and Ministers office. Corruption has swindled this great nation of billions if not trillions of dollars. Corruption is the root cause of all the suffering that has left Zimbabweans in agony. It is the cancerous disease Sir that led to the closure of ZISCO Steel, Kamativ Tin Mine, Willovale Motor Industry, N.R.Z, GMB and closure of Diamond Mining firms which in turn exacerbated cash crisis in Zimbabwe.

With this research I have conducted so far in developed and developing countries, I came to the conclusion that " A corrupt free Government is the cornerstone for national development". Therefore Sir, you can fly around at the expense of poor Tax payers Bond Notes talking and singing about development but it will remain a mirage. Why Sir? Because of the cancer called corruption. Mr. President you have failed us on corruption.
